Figure 1. A 3D visualization of a protein structure, likely a viral capsid, showing a complex arrangement of subunits. The structure is composed of several layers of subunits, with a central core. The subunits are colored in a gradient from blue to red, indicating different regions or states. The overall shape is roughly spherical but with a complex, faceted surface. A legend at the bottom left shows a color scale from blue to red, and a scale bar at the bottom right indicates a distance of 100 Å.

Figure 1: Schematic representation of the experimental design. The figure is divided into two main sections: 'Pretest' and 'Main Experiment'. The 'Pretest' section includes 'Pretest 1' (a 2x2 factorial design with 'Condition' and 'Group' factors) and 'Pretest 2' (a 2x2 factorial design with 'Condition' and 'Group' factors). The 'Main Experiment' section includes 'Main Experiment 1' (a 2x2 factorial design with 'Condition' and 'Group' factors) and 'Main Experiment 2' (a 2x2 factorial design with 'Condition' and 'Group' factors). Each section shows a flow from 'Stimulus' to 'Response'.
